

Work starts on gas fields near Mendota

Fresno Bee, 1-13-10

Construction began this week on a \$200 million project to convert depleted natural gas fields near Mendota into an underground storage facility for the fuel.

The 5,000-acre Gill Ranch Storage facility will include a 30-inch, 27-mile pipeline that will connect the fields with a major PG&E supply line near Interstate 5 north of Panoche.
